

Hillside Improves School Bus Safety

As part of the Hillside School District's ongoing efforts to ensure the safety of our students, security cameras have been installed on all Hillside School district-owned school buses as of Friday, February 16, 2018. Each bus has been equipped with multiple cameras with audio capability. The cameras will record incidents while traveling to and from school, as well as monitor how our bus operators are following safe driving procedures. The cameras will aid in addressing inappropriate/unsafe behavior on the bus, that may compromise the safety of our student travelers.

Hillside Public Schools will remain vigilant in identifying school security initiatives in light of recent reports of fatal school incidents. The school bus cameras are one of several Hillside Public School security initiatives that has been accomplished.
