

2017-2018 School Year in Review

The 2017-18 school year has been successful on many fronts. We have created new learning opportunities for students and leadership opportunities for teachers, including, but not limited to, project based learning, flipped classrooms, visible learning strategies and vertical articulation. We have cultivated corporate partnerships, secured grants to improve our facilities and put valuable resources in the hands of students. We continue to keep the main thing the main thing - students. As a result, student engagement and achievement continue to climb.
